Technical Guide:
Transferring Lockout Authority

Step 1: Navigate to the Lock Info screen and select 'Transfer'. Note that only the Lockout Authority can initiate a transfer.

Step 2: The 'Transfer to User' screen will pop up, select the user you want to transfer Lockout Authority to.

Note: You can only transfer Lockout Authority to another user already involved in that lockout activity. The intended recipient must first apply their lockout (which can be done remotely).
